We are still in red flag conditions

We have low humidity until early evening today

We made some good progress yesterday in areas

We issued some more mandatory evacuations in Sonoma county areas

Additional resources continue to come into these incidents allow us to move from structure defense to getting some containment started

We are hoping weather continues to cooperate and be mild and allow us to make progress

## Questions

How close is fire to Calistoga?

Fatigue is a big factor

We are identifying those who need rest

Especially now that we have more reinforcements coming

Public service employees are here to help

We pull them in for safety and rest

Which are you more concerned about today

It's not which fire

But which part of which fire

Tubbs Fire is a significant concern

It threatens to come back into Calistoga

We have same threat on east side of Napa county

Threatens to move into Solano county and Beryessa area

Sonoma county

It is a matter of what parts of what fire we have concerns about

We have a long way to go

All fires always get investigated

It will be thoroughly evaluated

Cause will come out for all of these fires eventually

Reports on missing people

I'd have to refer to the Sheriff

We are checking with families and friends

Unfortunately, people take off and stay with friends

Unless they are using the websites, we have suggested we don't have a way of finding them

Website to register if looking for family member

Pressley fire

Small fire

Pressley and Adobe have not combined yet

Until they are contained

? escorting people in - what qualifies – question for Sheriff  
to retrieve medication

check on animals

check on loved ones who stayed

people with business needs – wineries
